- Coaching during the test is not allowed.

Equipment Check:

The judge will perform the equipment check as part of the judging process.

**IT IS HIGHLY RECOMMENDED THAT YOU MARK X, ESPECIALLY IN THE LARGE ARENAS.
A SMALL PILE OF SHAVINGS WORKS WELL.**

Arena Sizes for Ridden Dressage

For tests allowing for either size arena, you may use either one.
 Be aware that some test call for only 1 size arena. In those cases, you must use that.
 Below are the dimensions needed for you to set up your arena at home.

Large	Small
20m x 60m	20m x 40m
<i>equals</i>	<i>equals</i>
65'-7.4"	65'-7.4"
x	x
196'-10.2"	131'-2.8"

- In the LARGE arena:
- Place a mark on the long rail at the following distances from the corner:
 - M: 6m = 19.7'
 - R: 18m = 59.1'
 - B: 30m = 98.4'
 - P: 42m = 137.8'
 - F: 54m = 177.2'
 - Place your letters 2 feet from the rail as these marks
 - Repeat on the other long side

- In the SMALL arena:
- Place a mark on the long rail at the following distances from the corner:
 - M: 6m = 19.7'
 - B: 20m = 65.6'
 - F: 34m = 111.5'
 - Place your letters 2 feet from the rail as these marks
 - Repeat on the other long side
 - C is 10m (or 32.8') in on the short side. Place that letter 2' from the rail as well.

Sport Horse In-Hand Triangle Set-up & Video Rules

Horses will stand in the "open position" for conformation judge both BEFORE and AFTER the walk and trot around the triangle. The entire horse must be in-frame at all times.

Conformation View #1

Before the walk, show the left side of the horse for at least 10 seconds.

Movement Evaluation

Horses will travel to the right (clockwise) around the triangle two (2) times. Be sure to travel on the outside of the cones.

The first circuit will be at the walk and the second time at the trot.

Dependent upon the space available, you have 2 options in which to set up the triangle.

Diagrams and dimensions are picture below.

Conformation View #2

After the trot, show the right side of the horse, plus a view from the back and the front.

The camera can be moved to get the front and back views OR you can reposition the horse.

- Place a cone in each corner
- Horse travels clockwise around the outside of the cones.

- Place a cone in each corner and midway along each of the left and right sides.
- Horse travels at a walk clockwise around the outside of the cones marking the small 15m triangle.
- Horse then travels at a trot (clockwise) around the outside of the larger triangle.

Setting Up Your DRIVEN Dressage Ring

2-3 people make set-up faster and easier.

Print this guide and take it with you during set-up.

1. Determine where you ring will be placed.

The area should be as flat as possible. If desired, allow additional room to drive around the outside of the ring and for placement of the letters.

2. Gather your tools.

You will need the following:

Stakes (4)

Hammer (1)

Masonry Line

(400' for the small ring or 500' for the large ring)

Tape Measure (min 10' with wide blade)

Permanent Marker

Long Tape Measure

(300' for the small ring or 350' for the large ring)

Electrical Tape (optional rail marker)

Small	Large
40m x 80m	40m x 100m
<i>equals</i>	<i>equals</i>
131' 2.8"	131' 2.8"
X	X
262' 6"	328' 1"

3. Set Your Corners and Rails

- Locate the position of one corner and drive a stake.
- Set the rails using the Pythagorean Theory.
- Mark 1 rail at 6', Mark the 2nd rail at 8'.
- Move the end of the rails until the diagonal line created by the marks equals 10'.

4. Stretch the masonry lines

- Place one along each of the long and short sides and secure to a stake. Place the stakes at the appropriate length of width of the ring you are building.
- Place your rails along these lines.

5. Set Your Next Corner and Rails

- Repeat step 3 & 4 for each of the next corners and sides.

Driven Dressage: Place The Letters

6a. In the SMALL ring:

- Place a mark on the long rail at the following distances from the corner:
 M: 10m = 32' 10"
 B: 40m = 131' 3"
 F: 70m = 229' 8"
- Place your letters 2 feet from the rail at these marks
- Repeat on the other long side
- C is 20m (or 65' 7") in on the short side. Place that letter 2' from the rail as well.
- A is also 20m (or 65' 7") in on the short side. Place that letter away from the opening

6b. In the LARGE ring:

- Place a mark on the long rail at the following distances from the corner:
 M: 10m = 32' 10"
 R: 30m = 98' 5"
 B: 50m = 164' 1"
 P: 70m = 229' 8"
 F: 90m = 295' 3"
- Place your letters 2 feet from the rail as these marks
- Repeat on the other long side
- C is 20m (or 65' 7") in on the short side. Place that letter 2' from the rail as well.
- A is also 20m (or 65' 7") in on the short side. Place that letter away from the opening

7. HINT: Mark the Rails (Optional):

Mark the letter points on the rails with a contrasting color of tape for more precision riding.

WESTERN DRESSAGE ASSOCIATION®

OF AMERICA

GUIDELINES FOR GAITED HORSES

There are a significant number of gaited horse breeds (about 30 in North America), all with gaits specific to their breed. In Western Dressage competition, the gaited horse will perform a saddle gait in place of the jog. The saddle gait selected should be the gait in which the horse is balanced and athletically comfortable performing. The saddle gait is a 4 beat lateral or diagonal gait, timely and evenly performed. The tempo, rhythm and foot falls of the gait they choose to show must not change throughout the test. The true four beat gait the horse performs, should be able to be ridden in a working, lengthened, free and collected manner as the Western Dressage test calls for.

All rules can be found in the USEF Rule Book under Western Dressage.

WD106 Saddle Gait

The saddle gait has a noticeable increase in cadence from the working walk. Excessive speed or slowness will be penalized.

1. In lieu of a jog, gaited horses perform gaits of various rhythms and footfalls. The gaited horse will perform a saddle gait in place of the jog.
2. The saddle gait may be either a lateral or diagonal gait, timely and consistently performed. The tempo, rhythm and foot falls of the gait the rider chooses to perform must not change throughout the test. The gait the horse performs, should be able to be ridden in a working, lengthened, free and collected manner as the Western Dressage test specifies.
3. The quality of the saddle gait is judged by general impression, i.e. the regularity and rhythm of the steps, the cadence and impulsion. This quality originates from the horse having a supple back and well engaged hind quarters, and the ability to maintain the same rhythm and natural balance in all variations of the saddle gait.
 - a. Collected Saddle Gait. The horse, remaining “on the bit”, moves forward with the neck raised and arched and showing clear self-carriage. The head approaches the vertical position and a light contact is maintained with the mouth. The hocks are well-engaged and must maintain an energetic gliding impulsion, enabling the shoulders to move more freely. Although the horse’s steps are shorter than in the other saddle gaits, elasticity and cadence are not lessened.
 - b. Working Saddle Gait. With an energetic, regular consistent rhythm; the horse must go forward with consistent and elastic steps. The back must be relaxed and the shoulders free, while there is an obvious push from the hindquarters. The hind legs actively glide under the horse. The horse must show proper balance and maintain light contact with the bit. The horse’s nose must be on or slightly in front of the vertical.
 - c. Lengthening of Stride. This is a variation of the Working saddle gait; the horse covers more ground while maintaining the same tempo, consistent rhythm as in the Working saddle gait. Speeding up is a fault.
 - d. Free Saddle Gait. The Free saddle gait will show moderate lengthening of stride and frame compared to the Working saddle gait. Without hurrying, the horse goes forward with clearly lengthened steps, with impulsion from the hindquarters and uphill balance. The rider allows the horse to carry the head a little more in front of the vertical than at the Collected and the Working saddle gait. The horse’s neck is “out”, down and forward, with the nose slightly in front of the vertical, with a loose rein and the poll at approximately the same height as the wither (the neck is level). The steps should be consistent, the whole movement balanced and unconstrained, while maintaining a consistent rhythm.
